# Rounding and Suppression

### The data contained in the table has been rounded and suppressed as follows:

Numerators and denominators have been rounded to the nearest 10. Where the numerator or denominator rounds to 20 or less, the data is suppressed with an “**N**”.

Percentages are rounded according to the smallest, unsuppressed denominator in a given mode and characteristic. If the denominator rounds to:

- 50 or less: percentages are rounded to 5%
- 1000 or less: percentages are rounded to 1%
- More than 1000: percentages are rounded to 0.1%

“**N/A**” is displayed where there is no provision in a given mode or level.

“**DP**” indicates suppression for data protection reasons. This is applied where the numerator is two or less, or differs from the denominator by no more than two students.
